Ref: Brough Hawk AJT Stream 3 Requirements

To whom it may concern,

BAE Systems has recently signed a 3 year contract with Rockford Components Limited to manage the Purchasing and Supply of Electrical components for their Hawk AJT "Stream 3" requirements. This is the result of many months work to select a suitable supplier to discharge this activity in the most cost effective manner for both parties.

This approach may result in some changes to the working relationship that your company has with BAE Systems. However, notwithstanding this, we respectfully request that your company fully supports this strategic decision and continues to provide the level of service that is expected to enable BAE Systems to discharge its Hawk business.

Should you have any concerns regarding this activity then please feel free to contact the undersigned.

Yours faithfully
For and on behalf of
BAE SYSTEMS (OPERATIONS) Limited

Gary Crank
Procurement Manager (Aircraft Parts)

Dave Ellis
Supply Chain Manager
