Silver Award

Rockford has been awarded the SC21 silver award for a third year

Sales and Marketing Director of Rockford, Chris Parsonage, was present at the awards ceremony in Belfast in early February to receive the honours for the SC21 silver award. All three of Rockford's UK facilities have been awarded the SC21 silver status for the third year in a row.

The SC21 Silver award is awarded for high standards of delivery, quality, sustainable improvement, and relationship excellence. This award reflects the exacting requirements of many defence and aerospace organisations worldwide.

Rockford designs and manufactures high-quality system-level electrical equipment that provides a simplified supply chain for commercial aerospace markets. This is provided from prototype to production and with global on-site support.

Supplying manufacturing capacity in cable assemblies, wiring harnesses, looms and electro-mechanical systems, Rockford provides customers with a lean supply chain which is aligned to the customer's future capacity needs. Rockford couples this with a best-cost and quality approach to component sourcing, and offers a one-stop-shop for all electrical requirements to simplify fragmented supply chains.

Rockford designs and manufactures complex cables that provide a competitive and reactive supply chain for industrial markets. Customers receive detailed documentation packages with drawings, they retain the intellectual property for designs, and Rockford supports low to medium volume orders.

Rockford's high-performance, environmentally sealed, next-generation, high-speed, flexible cabling mitigates risk for customers. An independent view of the supply chain enables a standardisation of design and results in a significant cost reduction for customers. Rockford can meet defence and aerospace offset requirements and provide engineering and production capacity for rapid prototyping.

Chris Parsonage says, "Rockford is extremely proud to be given the SC21 award for a third year, as it reflects on our professionalism and commitment to our values and our company mission of delivering global excellence by design."

ABOUT ROCKFORD

Rockford's unique engineering-driven approach to design and manufacturing delivers a cost-effective, high-quality solution to customer needs.

Rockford has since 1978 successfully addressed the high-reliability requirements of the major Original Equipment Manufacturers (OEMs) in the defence and aerospace sectors. Our broad capability and competitiveness, combined with a reactive attitude to service means Rockford has become a major part of many important supply chains.

Rockford has the capabilities, technologies, products, and knowledge to design, manufacture, test, and deliver system-level electrical equipment that ranges from simple electrical cable assemblies and electro-mechanical sub-assemblies, and on to complete systems.

We offer a simplified, competitive and reactive supply chain, meeting your offset requirements and mitigating your risk: Designing high-performance, environmentally sealed, next-generation, high-speed, flexible cabling and system-level electrical equipment with engineering and production capacity for rapid prototypes and low to medium volume orders, delivered with on-site global engineering support.

Rockford has over 280 employees, 39 years of experience and operates from three SC21 Silver award-winning sites around the UK.

Rockford has been given the SC21 Silver award thanks to high standards of delivery, quality, sustainable improvement, and relationship excellence. The SC21 award reflects the exacting requirements of many defence and aerospace organisations worldwide.

Rockford can deliver a globally competitive solution through design excellence, ensuring all customer requirements are captured and met. Rockford's lifecycle management offers prototyping, on-site-installation, production, logistics, spares and obsolescence management.

Rockford is extremely proud to be given the SC21 award for a third year, as it reflects on our professionalism and commitment to our values and our company mission of delivering global excellence by design.
