

SIX CRITICAL LOGISTICS SERVICES

Reduce your aircraft on ground risk by choosing the right logistics partner.

URGENT OPERATION

You have urgent operational requirements, so your logistics provider must be highly responsive.

BALANCED SUPPLY

Logistics services should help balance unpredictable and complicated supply chains.

USAGE REPORTS

Reports on your logistics usage trends increase your efficiency and lower costs.

OBSOLESCENCE

Determines when components will no longer be available, then mitigates your risk by sourcing and storing them for you.

OFFSET PRODUCTION

Allows you to move some of your production to UAE to meet your offset obligations and benefit from a regional export capability.

KITTING SERVICE

Assists with fragmented supply chains by kitting items for manufacturing or for an in-field upgrade, retrofit or repair.
