INDUSTRIAL TRANSPORTATION & NUCLEAR

Rockford designs, manufactures and supplies products for high-reliability industrial purposes such as those in the automotive industry, shipping industry, train industry and more.

Rockford's capabilities in design, interconnect, testing, logistics, and system solutions allows Rockford to complete projects from simple cable assemblies to full systems.

With the ability to build to print or build to specifications, Rockford has established itself in a desirable position building cable assemblies, complete systems and sub-systems for a variety of commercial applications.
