

WHY YOUR INTERCONNECT MATTERS

Interconnect is often last looked at in the planning of major aircraft projects, but it's vital that you choose the right partner.

1

Environmental conditions will affect performance of interconnect, so it's important to choose a provider that can deliver **durable interconnect products**.

2

Dynamic movement and vibration can cause **interconnect wear and failure**. Make sure your interconnect is stress-tested and designed for high-reliability.

3

Your interconnect might be the key to keeping your **personnel and platform safe**, so why not buy interconnect guaranteed to the very highest standards?
