

# WOVEN CABLES

ROCKFORD - DELIVERING GLOBAL EXCELLENCE BY DESIGN

Building a low-profile, incredibly strong and highly flexible complex cable assembly using our unique woven technology. Rockford's woven cable technology is one-of-a-kind within the UK. The use of woven cables greatly increases the space envelope for your platform.

**ROCKFORD**

# WHO WE ARE

Rockford is the UK's largest independent provider of wiring, interconnect & system solutions for the aerospace, defence and industrial markets.

# WHAT WE DO

With over 40 years of wire harness design experience, we design, prototype, and manufacture IP68 sealed box builds, PDUs, control units, control panels, or electro-mechanical assemblies. We offer rapid prototyping with fabricated, machined or cast enclosures and have a pedigree in defence platforms.

The woven cables can be manufactured using a range of fabric materials such as, Kevlar, Nomex, PEEK, Nylon and Polyester, which allows our customers to use smaller and lighter wires as the tensile strength is provided by the weave material.

# PEDIGREE

Customers include; BAE Systems, Lockheed Martin, Williams Fairy Hydraulics, Thales, Moog, and General Dynamics.
